

TO WHOM IT MAY CONCERN

Green Pest Control installed termite baits in a perimeter around my home in Mermaid Waters, Queensland about five years ago after finding termite infestation in a wooden sleeper retaining wall on my property.

After removing the sleeper retaining wall, the baits were the subject of "strikes" by termites six or seven times in the first two years and were treated with arsenic dust.

Over the next couple of years, the "strikes" occurred with much less frequency and we have had only one "strike" over the last 12 months.

No termite problems have been found in the house itself.
