Comments:

Perhaps you should have a spot on your website to specifically add testimonials. Here is one from me that I am happy for you to add to your site. Yvonne M, Robina, December 2004

"We had Green Termite Baits installed on our property about five months ago and opted for the full service option. Two months ago 4 baits were active and last month 2 more were found to be active. The fact that the baits are working has given us peace of mind. The staff who installed the baits and check them monthly have always been very professional and efficient. They advise me when they arrive and before they leave. On the two occasions when baits have been active, they have notified me and allowed me to inspect the baits myself. I would recommend this service to anyone interested in trying to reduce the risk of termite damage to their homes."
